

Values Statement: I will create wisely. I will value my family and will cherish and forgive them and all others. I am and always will be curious about the world around me and the one that is yet to come.

Leadership Point of View: To brighten humanity through creation and community. To use my time here to work toward a better world for future generations. To be Alive and ON.

The Newton Fellowship has been foundational to my growth as a person at CU. I have not been a part of a group that has had more amazing and impressive people. Being surrounded by my peers in the fellowship has reminded me of the depth and talent of the people that I get to go to school with. My key takeaway comes from the people. I will never forget the feeling of being in a room with so many endlessly interesting people and ease of talking to and sharing with them. I am grateful to the Newton fellowship for bringing me together with these people and teaching me that they're out there, it's just a matter of finding them.
