PROFILES OF NONPROFIT EDUCATION MANAGEMENT ORGANIZATIONS: 2009-2010

Gary Miron and Jessica L. Urschel, Western Michigan University

Executive Summary

This is the third Profiles report to examine nonprofit education management organizations (EMOs). This report is modeled after the 12 annual reports that cover for-profit EMOs. While the number of schools operated by for-profit EMOs grew rapidly in the 1990s and is now leveling off, the data contained in this report illustrate how the number of schools operated by nonprofit EMOs has been growing more steadily and steeply over time. Since the previous year alone, the number of nonprofit EMOs has increased by 2.2%, the number of schools operated by nonprofit EMOs increased by 10.0%, and the number of students enrolled in these schools increased by 22.2%

National Landscape

- Nonprofit EMOs operated public schools in 26 states during the 2009-10 school year.
- Nonprofit EMOs are most prevalent in Texas, California, Arizona, and Ohio.
- Nonprofit EMOs are garnering more support and are growing steadily, while the growth of for-profit EMOs is slowing.

Organizations

- A total of 137 nonprofit EMOs were identified and profiled in this report, including 19 large nonprofit EMOs, 52 medium-sized, and 66 small nonprofit EMOs.
- The number of nonprofit EMOs that operated at least one charter school in 1995 is estimated to be 5. This number has been steadily increasing since that time.
- KIPP, the Knowledge is Power Program, a national charter school network, experienced the largest net increase in schools during the past school year, from 64 to 82 schools.

Schools

- A total of 813 public schools were managed by nonprofit EMOs during 2009-10.
- Of the schools profiled, 47% were managed by large-sized nonprofit EMOs, which manage 10 or more schools.

- Medium-sized nonprofit EMOs, which manage between four and nine schools, accounted for 34% of the schools profiled.
- Primary schools constitute 34% of managed schools. Middle schools, at 19%, and high schools, at 20%. Schools classified as “other,” (i.e., they are ungraded or have grade configurations that overlap the previous mentioned levels) comprise 28% percent of the schools managed by nonprofit EMOs.
- Less than 0.5% of schools managed by nonprofit EMOs are virtual schools.
- Over 97.5% of schools managed by nonprofit EMOs are charter schools.

Students

- Large nonprofit EMOs currently account for 45% of all students enrolled in nonprofit EMO-managed schools. This has increased from 42% in 2008-2009.
- Medium-sized EMOs enroll 37% of students in nonprofit EMO-managed schools.
- Small EMOs enroll 18% of students in nonprofit EMO-managed schools.
- Medium-sized nonprofit EMOs have a larger average school enrollment than the large- and small-sized EMOs. This is in contrast to for-profit EMOs, where the large-sized EMOs also have the largest average school size.

School Performance Relative to Federal and State Rating Systems

- We were able to gather Adequate Yearly Progress (AYP) ratings for 738 of the 813 schools managed by nonprofit EMOs (90.8%). AYP provides a crude indicator of the extent to which schools are meeting state standards. We present this information as descriptive data of current school performance. Readers should keep in mind that schools with high concentrations of low-income students are less likely to meet AYP.
- Of the schools managed by nonprofit EMOs, 60% made AYP and 40% did not. This can be compared with the schools managed by for-profit EMOs, 53% of which made AYP and 47% did not.
- Large-, medium-, and small-sized nonprofit EMOs had roughly equivalent proportions of schools making AYP at 58%, 62%, and 61%, respectively.
- District schools managed by nonprofit EMOs had significantly lower performance ratings (22.2% met AYP) relative to the charter schools operated by nonprofit EMOs (61.0% met AYP).
- In terms of state-specific ratings, we were able to gather information on 640 of the 813 schools (79.7%). Given that each state’s rating system vary, it was not possible to summarize and synthesize this data in a meaningful way. Nevertheless, the results for schools within the same state can be compared and summarized.

Profiles reports are comprehensive digests of data on education management organizations. Analysis and interpretation of the data in this report are based on three years of data collection from nonprofit management organizations as well as the creation of estimated growth trends based on when EMOs and the schools they operate report that they were founded. Where relevant, a few comparisons are also made with for-profit EMOs.

PROFILES OF NONPROFIT EDUCATION MANAGEMENT ORGANIZATIONS: 2009-2010

Introduction and Background

The EMO Industry: Background and Rationale

Education management organizations, or EMOs, emerged in the early 1990s in the context of widespread interest in so-called market-based school reform proposals. Wall Street analysts coined the term *EMO* as an analogue to health maintenance organizations (HMOs). Proponents of EMOs claim that they will bring a much-needed dose of entrepreneurial spirit and a competitive ethos to public education. Opponents worry that outsourcing to EMOs will result in already limited school resources being redirected for service fees, profits, or both for another layer of administration. Opponents also have expressed concerns about public bodies relinquishing control or ownership of schools.

Until recently, most attention has been focused on the for-profit EMOs. In recent years, however, more interests and private funds have been devoted to nonprofit companies or organizations that manage charter schools. While concerns about profit motives are not as apparent with nonprofit organizations, there are still concerns about how public governance of these schools is being affected by private, nonprofit EMOs.

Defining Education Management Organizations

We define an education management organization, or EMO, as an organization or firm that manages schools that receive public funds, including district and charter public schools. A contract details the terms under which executive authority to run one or more schools is given to an EMO, usually in return for a commitment to produce measurable outcomes within a given time frame.

Schools managed by the EMOs profiled in this report operate under the same admissions rules as regular public schools, even though they are privately operated. The term “education management organization” and the acronym “EMO” are most commonly used to describe these private entities that manage public schools under contract. However, other names or labels, such as “education service providers,” are sometimes used to describe these organizations. Additionally, it is important to distinguish between EMOs with considerable authority over a

school and vendors or service contractors that fulfill a much more limited role. Such vendors provide specific services for a fee, such as accounting, payroll and benefits, transportation, financial and legal advice, personnel recruitment, professional development, and special education. These sorts of contractors are not within the scope of this report.

EMOs vary on a number of dimensions, such as whether they have for-profit or nonprofit status, whether they work with charter schools, district schools, or both, or whether they are a large regional or national franchise or a single-site operator. Most research and policy attention until recently was given to the for-profit EMOs. However, increasing interest has been devoted to the fast-growing nonprofit organizations that manage charter schools. A subset of these nonprofit organizations is known as charter management organizations (CMOs). CMOs are distinguished by receiving substantial financial support from private foundations for the purpose of helping bring what they believe are successful models up to scale.

The boundaries that separate nonprofit EMOs from networks or community partnerships are rather blurred. During the course of researching this report, we encountered a number of difficult examples that were not easy to classify. KIPP, for example, indicates that it is a network and not an EMO¹. At the same time, KIPP has considerable influence over its schools, especially with regard to staffing and design of school. Furthermore, the New Schools Venture Fund identifies KIPP as a charter management organization since it was providing funds to two of KIPP's clusters of schools in order to help the organization expand the number of charter schools. For the purpose of this report, we have included KIPP as a nonprofit EMO, given its strong role in establishing and operating the schools within its network. As we continue our research on nonprofit EMOs, we hope to gain more clarity in the distinctions that separate management organizations, networks of schools, and partnerships with community-based organizations. This, in turn, should lead to a more nuanced discussion of these definitions.

Description of Data Collection and Sources of Information

This third annual *Profiles* report covers data for the 2009-10 school year. An effort is made to provide complete and current data on the numbers of EMOs, EMO-managed schools, and enrollments in EMO-managed schools. In addition to data on the 2009-10 year, the report also contains official 2007-08 and 2008-09 data and estimated longitudinal data from 1996 to 2006. Where possible and appropriate, we have corrected or updated past data that were missing or based on estimates. As previously stated, the nature of the industry and the lack of public information make the process of collecting and updating the data for the *Profiles* report difficult. In last year's report, EMOs were primary sources for the published information. This year we collected information on organizations and EMO-managed schools from states that tracked such information. Official October 2009 enrollments are reported for all states that had released this information or provided it to the authors by September 20, 2010. For the majority of states that do not track education management organizations and their managed schools, key informants, advocacy groups, and charter school sponsors were contacted with a list of known EMOs and

¹ Information provided by KIPP Manager of Public Affairs Justin Barra in June 2008.

EMO-managed schools and asked to provide additional information (for a complete list of state sources, see Appendix B).

After all state-level research was completed, representatives of each EMO were asked to confirm and, if necessary, correct organizations' and schools' contact information. EMOs were also asked to provide updated information for schools in those states for which official enrollments had not been released. If the organization provided enrollments or other information that did not match official state-level data, the official government data was used. In such cases, the EMO was informed of the decision to use the official data.

A minimum of two contacts were attempted to solicit a response from all large, medium-sized, and small EMOs. We were very pleased and grateful for the responses we received from EMOs. In most cases, we received complete details regarding schools and enrollments. In other cases, the data we received from the EMOs was missing enrollments or the years the EMO or schools were founded. In these cases, an additional attempt was made to gather this information. In a few cases in which official 2009 enrollments had not been released and the EMO did not respond, we relied on official 2008-09 enrollments (see Appendix C for a complete explanation of data collection).

Nonprofit EMOs are private organizations that may be largely beyond the reach of state open-records laws or other public disclosure requirements; thus, there is frequently no way to compel them to share detailed information about their operations (see individual profiles later in this report, which include notes on data sources). Unlike for-profit EMOs, however, the nonprofit entities are required to file a 990 tax form, which is subject to public inspection. These records are made available on the Guidestar website (www.guidestar.org) and offer a limited amount of financial information about nonprofit organizations, although no detailed information on individual schools or enrollments.

Using the 2009-10 Nonprofit Profiles Report

The data in this *Profiles of Nonprofit Education Management Organizations* describe general trends in the nonprofit EMO sector over time. They are intended for a broad audience including policymakers, educators, school district officials, and school board members who may use this information to learn more about current or potential contractors. Investors, persons involved in the education industry, and employees of EMOs may use the *Profiles* to track changes, strategize for growth, and plan investments.² Finally, journalists and researchers who study and seek to learn more about education management organizations may also find much here to interest them.

² Investors should independently confirm information prior to making investment decisions.

Findings for 2009-2010

The *Profiles of Nonprofit Education Management Organizations: 2009-10* is the third annual *Profiles* report that examines this particular subset of EMOs. The EMOs profiled in this report are categorized by size: small EMOs operate three or fewer schools; medium-sized EMOs operate four to nine schools; and large EMOs operate 10 or more schools.

Number of Education Management Organizations Profiled

Table 1 presents the estimated growth trend data for large-, medium-, and small-sized nonprofit EMOs. Our estimates are based on the founding date of charter schools currently managed by EMOs. One school established in the 1980s is currently operating as a charter school managed by a nonprofit EMO. For all practical purposes, this school is an anomaly. Therefore, we start mapping the numbers in 1995, which marks the pronounced start of the growth trend. In 1995, a total of 5 nonprofit EMOs were operating charter schools. The number of nonprofit EMOs grew consistently up to its current total of 137 companies or organizations. The number of states in which EMOs operate has grown from 4 in 1995 to 26 in 2009-10.

Table 1. Number of Nonprofit EMOs by Size and Year

	1995-96	1996-97	1997-98	1998-99	1999-00	2000-01	2001-02	2002-03	2003-04	2004-05	2005-06	2006-07	2007-08	2008-09	2009-10
Large EMOs	0	1	1	1	1	1	1	2	3	5	7	11	13	19	19
Medium EMOs	1	0	0	0	5	10	18	20	20	23	30	31	42	50	52
Small EMOs	5	16	25	47	65	71	76	85	92	95	90	86	76	65	66
Total number of EMOs	0	1	1	1	1	1	1	2	3	5	7	11	13	19	19
States with EMOs	4	5	7	10	13	13	14	20	21	22	22	23	24	25	26

Figure 1 illustrates the trends in the estimated number of nonprofit EMOs over the last 15 years. The total number of EMOs is represented by the solid dark line. While we believe that we captured nearly all medium-sized and large nonprofit EMOs, we are aware that there are likely more small EMOs that we have not yet discovered in our survey of the field. The small EMOs are more difficult to identify, and—as we have learned from the *Profiles* of for-profit EMOs—they are more difficult to obtain information from. Thanks to the large amount of official data gathered from state education agency sources, however, we are more confident that we have identified the vast majority of operating nonprofit EMOs.

Many of the new nonprofit EMOs that were identified and added to this report this year were actually in operation before the 2009-10 school year. Most of these are also operating schools in

Texas. Our information request this year to the Texas Education Agency yielded a much more comprehensive list of companies and private organizations that are charter holders or are operating charter schools. This information allowed us to identify and then communicate with more nonprofit and for-profit EMOs operating in Texas.

Figure 1. Illustration of the Actual Number of Profiled EMOs by Size

As Figure 1 clearly indicates, nonprofit EMOs have been growing steadily during the last decade. All but one nonprofit organization began as a small EMO (operating three or fewer schools) and the decline in the number of small EMOs reflects the growth of organizations already in operation, which moved many small EMOs into the medium and large categories.

Number of Schools Managed by Education Management Organizations

Table 2 displays the estimated number of schools managed by nonprofit EMOs between 1995-96 and 2009-10. A total of 813 public schools were managed by nonprofit EMOs during 2009-10. The total number of schools run by nonprofit EMOs has overtaken the number run by for-profit EMOs (729 in 2009-10). The largest reason for the increase in the number of EMO-operated schools in this report is our decision to list each campus of a charter school in Texas as a separate schools. These campuses are tracked by the Texas Education Agency separately and are given distinct building numbers and performance ratings. Also adding to the increased

number of schools in this year's report is the addition of Responsive Education Solutions, which is a new, large-sized nonprofit EMO that operates 35 schools in Texas. Also, Richard Milburn Academies, Inc, with its 14 schools, was reclassified as a nonprofit EMO this year. This EMO was incorrectly classified as a for-profit EMO in past reports.

Table 2. Number of Schools Managed by Nonprofit EMOs, By EMO Size

	1995-96	1996-97	1997-98	1998-99	1999-00	2000-01	2001-02	2002-03	2003-04	2004-05	2005-06	2006-07	2007-08	2008-09	2009-10
Large EMOs	0	10	11	11	11	11	11	24	48	78	117	179	227	328	381
Medium EMOs	7	0	0	0	22	46	89	102	108	125	158	176	236	251	277
Small EMOs	6	22	32	67	97	107	111	130	159	177	180	188	171	160	155
Total schools	13	32	43	78	130	164	211	256	315	380	455	543	634	739	813

Figure 2 illustrates the growth trends associated with the schools data in Table 2. The solid line represents the total number of schools operated by nonprofit EMOs by year.

Figure 2. Illustration of the Growth of EMOs in Terms of the Number of Schools They Operate

Figure 3 illustrates the distribution of EMOs by the number of schools they operate. As one can see, KIPP accounts for a very large proportion of the schools operated by nonprofit EMOs. KIPP was operating 82 schools in 2009-10, more than twice as many schools as the next largest nonprofit EMO, Responsive Education Solutions (35 schools).

Large EMOs account for 46.9% of all EMO-managed schools, medium-sized EMOs account for 34.1% of all EMO-operated schools, and small EMOs account for 19.1%.

This pattern contrasts sharply from that of for-profit EMOs. In the for-profit sector, large companies manage significantly more than the majority of the schools (67.5%), while the medium-sized companies account for only 20.1% and small firms 12.4%.

Figure 3. EMOs by Number of Schools They Operate

In last year's report, 97.2% of the public schools profiled were charter schools, compared with 85% of the public schools operated by for-profit EMOs. With the addition of many new Texas charter schools, this year 97.5% of all schools profiled were charter schools, compared with 93% of schools operated by for-profit EMOs. Less than 0.5% of all nonprofit EMO-operated schools are virtual schools, compared with 8.2% of for-profit EMO-managed schools. Three of the nonprofit virtual schools are located in Arizona; one is located in Ohio. (A virtual school delivers its curriculum and provides instruction via the Internet and electronic communication; see Appendix A for definitions.)

Number of Students in Schools Managed by Profiled EMOs

In this section we describe current student enrollment figures and offer estimates of overall trends. Schools operated by nonprofit EMOs enrolled 237,591 students in 2009-10. This represents a 22.2% growth in enrollment from the previous year.

Even though the number of nonprofit EMO-managed public schools has surpassed the number managed by for-profit EMOs, the for-profit EMO total enrollment is much larger (353,591 students in 2009-10) because of larger average school enrollments. With 484 students per school, the for-profit EMOs operated much larger schools on average than the nonprofit EMOs, which enrolled an average of 292 students per school. While the large for-profit EMOs had

substantially larger average school sizes than the medium-sized and small for-profit EMOs, the pattern is less clear with the nonprofit EMOs. Among nonprofits, the small-sized and large-sized nonprofit EMOs have very similar average enrollments (280 and 280.3, respectively). The medium-sized nonprofit EMOs have, on average, 315 students per school (see Table 3).

Table 3. Number of Students Per School in 2009-10

	Number of Schools	Number of Students Per School					
		Sum	Mean	SD	Median	Minimum	Maximum
Large EMOs	381	106,807	280.3	201.4	244	3	1,450
Medium EMOs	277	87,391	315.5	249.9	272	18	1,815
Small EMOs	155	43,393	280.0	225.2	234	9	1,755
All Nonprofit EMOs	813	237,591	292.2	223.9	249	3	1,815

Figure 4 illustrates growth in student enrollment in schools operated by nonprofit EMOs over the past 15 years. Note that the growth in the number of students rises more rapidly than did the growth trends for the number of EMOs or the number of schools. The reason for this is

Figure 4. Estimated Number of Students Enrolled in Schools Managed by Nonprofit EMOs by Year

that many schools are adding grades and classes each year. Thus, the number of students increases due to the addition of new schools as well as the addition of new classes within existing schools.

The average school size for the nonprofit EMOs are estimates derived by using data from 2007-08 and 2008-09, then calculating backward to estimate likely growth patterns. The average school size was estimated from year to year based on typical growth patterns for EMO-operated schools. The result was multiplied by the number of schools open each year.

The data in Table 4 display the number of EMO-managed schools and total enrollment of those schools by school type. The Common Core of Data definitions were used to classify schools as either “primary,” “middle,” “high,” or “other” (see definitions in Appendix A). Thirty-four percent of all nonprofit EMO-managed schools are at the primary level in 2009-10. By contrast, 57% of the schools managed by for-profit EMOs were primary schools. Because elementary schools costs less per pupil to operate than high schools, for-profit EMOs may have a financial incentive to focus on the lower-cost segment of the total K-12 school population.

Table 4. Numbers of Schools and Students Enrolled, by EMO Size and School Level, 2009-10

	Primary			Middle			High			Other		
	Sch- ools	Students/school		Sch- ools	Students/school		Sch- ools	Students/school		Sch- ools	Students/school	
		Sum	Mean (SD)		Sum	Mean (SD)		Sum	Mean (SD)		Sum	Mean (SD)
<i>Large</i>	118	36,561	310 (198)	90	25,012	278 (159)	64	18,662	292 (204)	109	26,572	244 (229)
<i>Medium</i>	92	30,031	326 (222)	41	13,082	319 (158)	64	16,618	260 (186)	80	27,660	346 (343)
<i>Small</i>	63	19,034	302 (174)	22	5,633	256 (167)	35	8,617	246 (221)	35	10,109	289 (325)
<i>All EMOs</i>	273	85,625	314 (201)	153	43,360	286 (160)	163	43,872	269 (201)	224	64,340	287 (292)

Number of EMOs by State

Figure 5 illustrates the distribution of EMOs by state. Texas has the most nonprofit EMOs, with a total of 45 organizations that operate 1 or more public charter schools. The next closest state, Arizona, has 25 nonprofit EMOs operating within its borders. California, Illinois, Michigan, and New York also have a sizeable number of nonprofit EMOs, with 16, 12, 11 and 10, respectively.

While Figure 5 displays the number of organizations in existence, Figure 6 displays the number of schools operated by nonprofit EMOs per state. Texas stands out, with 290 schools operated by nonprofit EMOs. California and Arizona follow with less than half of the number operating in Texas, with 110 and 103 nonprofit EMO-managed schools respectively. Ohio and Illinois follow further behind, with 72 and 54 schools, respectively managed by nonprofit EMOs. In terms of *proportion* of its charter schools operated by nonprofit EMOs, Texas leads once again with nearly 70% of all charter schools are operated by nonprofit EMOs. The next closest state is

Illinois, with 57% of its charter schools operated by nonprofit EMOs. Although there are large numbers of both nonprofit and for-profit EMOs in Arizona they tend to manage, on average, fewer schools.

Figure 5. Number of Nonprofit EMOs by State

Figure 6. Number of Schools Operated by Nonprofit EMOs by State

AYP Status/State Rating

The current report is the first nonprofit *Profiles* report in which adequate yearly progress ratings and state-specific ratings were included as general measures of school performance. This information was gathered using official state education agency sources. In some cases where data was not up-to-date or complete, however, we relied on the EMOs themselves to update this

information. We were able to gather Adequate Yearly Progress (AYP) ratings for 738 of the 813 schools managed by nonprofit EMOs (91%).

Of the schools for which we were able to gather data on AYP status, 60% made AYP, while 40% of the schools did not. This can be compared with the schools operated by for-profit EMOs, in which 53% made AYP and 47% did not. When AYP status was separated by EMO size, large, medium and small-sized EMOs had roughly equivalent proportions of schools making AYP at 58%, 62%, and 61%, respectively. This is in sharp contrast to the schools operated by for-profit EMO, in which small-sized EMOs had a significantly higher proportion of schools making AYP (70.8%) than did either medium-sized EMOs (54.3%), or large EMOs (49.5%).

Of the 20 district schools that are managed by nonprofit EMOs, only 22.2% met AYP. This can be compared with charter schools operated by nonprofit EMOs, for which 60.2 met AYP.

Figure 7 illustrates the proportion of schools meeting AYP for each of the large-sized nonprofit EMOs. Among the large-sized EMOs, those organizations with the lowest proportion of schools meeting AYP are Achievement First (20%), Academy for Urban School Leadership (15%), and Richard Milburn Academy, Inc. (0%). Aspire Public Schools (90%), Constellation Schools (86%), and Shekinah Learning Institute (85%) had the highest proportion of schools making AYP.

Figure 7. Percentage of Schools Meeting AYP for Large-Sized Nonprofit EMOs

Figure 8 illustrates the proportion of schools meeting AYP for each of the medium-sized nonprofit EMOs. Among the medium-sized EMOs, those companies with the lowest proportion of schools meeting AYP are Aspira, Inc. of Illinois, Innovative Education Management, Inc., Orenda Education, Perspectives Charter Schools, and UNO Charter School Network, all with 0% of their schools making AYP. Cesar Chavez School Network, Choice Education and Development Corporation, Great Hearts Academies, Kingman Academy Of Learning, LEAD Charter Schools, Mastery Charter Schools, Mastery Learning Institute, Propel Schools, Salvaging Teens at Risk, Inc., Skyline Schools, Inc., Success Charter Network, The Charter Foundation, Inc., Tucson International Academy, Inc., Uncommon Schools, and YES Prep Public Schools all had 100% of their schools making AYP.

Figure 8. Percentage of Schools Meeting AYP for Medium-Sized Nonprofit EMOs

Adequate yearly progress is the measure of the extent to which students in a school meet annual achievement targets in reading and mathematics. Each state develops its own definition of AYP; these definitions must reflect the objective of all students demonstrating proficiency by the 2013–14 school year. While the AYP ratings provide an indicator of performance that can be applied across states, it is important to note that this is a relatively crude indicator of whether or not schools are meeting state standards. Those EMOs managing schools that target more disadvantaged populations are more likely to not make adequate yearly progress, while EMOs whose schools have college prep profiles or serve few disadvantaged students have a much better chance of making AYP. More specific results can often be obtained from state-specific assessment programs.

In addition to AYP, we have also reported data from state-specific school ratings in this year's *Profiles* report. These state ratings vary considerably from state to state. Most often the state rating systems involve a letter grade assigned to schools. Because of the wide range of ratings available from state to state, it was impossible to run descriptive statistics on this data. For each school listed under each profiled EMO, it is possible to see both AYP status and, where available, state ratings (see Appendix B for a complete list of state rating sources). In terms of state-specific ratings, we were able to gather information on 640 of the 813 schools (79.9%).

Description of the Appendices

The appendices contain important information that will be helpful in using the *Profiles*. Below is a list of appendices and a brief description of each:

- **Appendix A** contains definitions of terms and notes that will be helpful in understanding the organization summaries and profiles.
- **Appendix B** contains notes on state-level resources
- **Appendix C** contains notes on EMO responses.
- **Appendix D** contains the methods for compiling school profiles and criteria for inclusion as a nonprofit EMO.

Acknowledgements

The authors would like to recognize and thank Xiaojie Hu and Yu Du for assistance with data collection. The authors would like to thank the many university-based academics, representatives from state advocacy groups, teachers' unions, and state education agencies that responded to our requests for information and provided feedback on the completeness and accuracy of our lists of organizations and schools. Finally, we are grateful to all those nonprofit EMOs that responded to our requests for information or that reviewed our organization-specific profiles in order to confirm or correct the information on the schools they operate.

Appendix A

Reader's Guide

Definition of Terms

- **Charter School:** Charter schools provide free elementary/secondary education under a charter granted by a legislatively recognized public entity or publicly appointed entity so that they qualify for local and state taxpayer funds in the same way as conventional district schools.
- **Virtual School:** A virtual school (also known as cyber school) delivers its curriculum and provides instruction via the Internet and electronic communication. A virtual school meets the definition and requirements of schools as specified in state statutes.
- **Education Management Organization (EMO):** An EMO is an organization or firm that manages at least one school that receives public funds and operates the public school(s) it manages under the same admissions rules as regular public schools. EMOs can be for-profit or nonprofit organizations. They can manage traditional public schools or charter schools.
- **Instructional Levels:** Instructional levels are calculated from the lowest and highest grades for which students are enrolled in a school. According to the Common Core of Data:
 - *Primary schools* are those with a low grade of prekindergarten through grade 3 and an upper grade of up to 8.
 - *Middle schools* contain a low grade of 4-7 and an upper grade ranging from 4 to 9.
 - *High schools* have a low grade of 7 to 12 and must extend through grade 12.
 - *Other* includes all other grade configurations, including schools that are completely ungraded.

Appendix B: State Resources Table

State	Enrollment Reported	AYP Reported	State Rating Reported	Relevant websites	Notes
AR	2008-2009	2008-2009	2008-2009	http://normessasweb.uark.edu/schoolperformance/School/School.php?Sch=A&Submit=Continue	Information on Arkansas EMO-managed schools provided by Mary Ann Duncan, Arkansas Department of Education.
AZ	2009-2010	2009-2010	2008-2009	http://www10.ade.az.gov/ReportCard/Default.aspx?ReportLevel=1	All information regarding Arizona's EMO-managed schools was retrieved from the Arizona Department of Education website.
CA	2008-2009	2008-2009	2008-2009	http://dq.cde.ca.gov/dataquest/	California SEA does not track EMOs or EMO-managed schools. Key informants knew of no additional EMOs or EMO-managed schools operating in California.
CO	2009-2010	2009-2010	2009-2010	http://www.schoolview.org/SchoolPerformance/index.asp?letter=D#list	Information on Colorado EMO-managed schools provided by Pamela Hines, Colorado Department of Education.

Appendix D

Methods for Compiling School Profiles

Compiled each year since 2007-2008, *Profiles of Nonprofit Education Management Organizations* documents the number of nonprofit firms involved in managing publicly-funded schools, identifies the schools they manage, and records the number of students those schools enroll. The Nonprofit Profiles report is modeled after the *Profiles of For-Profit Education Management Organizations* which has been compiled each year since 1998-1999. The *Profiles* report was compiled using a combination of data sources. This year the research began with a focus on state departments of education. Each state known to have nonprofit EMOs in operation was contacted to determine whether the state was tracking education management organizations and their schools. If a state tracked EMOs and had released current year enrollments, that information was used to update our data on the EMOs and the schools they operate in that state. Very few states are tracking EMOs or have information on the number and scope of EMO involvement. Therefore, after considering official state sources, we used one or more of the following methods to identify additional EMOs and EMO-managed schools: examination of state charter school directories; general Internet searches; and contacts made with advocacy groups, charter school sponsors, charter schools, or other key informants (see Appendix B for a complete list of methods used for each state).

After this round of state-level research was completed, each identified for-profit EMO was sent a document with descriptive information collected about the company and its schools. Representatives of the EMO were asked to confirm this information. Even though states did not have much data that identified EMOs, once we could determine which schools were operated by EMOs, we relied on the vast amount of information available from official state sources. Therefore, fewer attempts were made to solicit a response from EMOs for the current report than had been attempted in past years. In all cases, two contacts were attempted to solicit a response from each large, medium, and small EMO. Due to the more favorable response rate to faxes sent in 2007-2008, the authors decided to focus on this medium of contact for the current report. In most cases, two faxes were sent to each EMO. If the EMO did not list a fax number, an email was sent to all contacts listed on the company website or through the company website contact form. If neither a company email nor fax number could be located, faxes were sent to the first school listed on the company profile.

As a reflection of the fewer attempts to contact EMOs, we also received a lower response rate than in previous years. Eleven percent of large EMOs responded to our requests this year. We received responses from 17% of medium EMOs in 2009-2010 and 14% of small EMOs.

In most cases in which we received a response, we received all of the information we sought. In a few instances, the returned company profile was still missing years founded or updated enrollments. In these cases, one additional contact was attempted via email to gather the omitted information. For schools in states in which official enrollments had been released, those numbers were reported regardless of the enrollments reported by EMOs. In states for which 2009 enrollments had not been released, updated enrollments sent by the companies were used. In some cases, the state had not yet released 2009 enrollments and the company did not respond. For these schools, official 2009-2010 enrollments have been reported.

The companies profiled represent those Education Management Organizations that the authors could positively identify as for-profit management companies and those classified as Education Management Organizations by state departments of education.
